DECEMBER 2011**

Employer costs for employee compensation in private industry among the four geographic regions of the country ranged from \$25.88 per hour in the South to \$32.85 in the Northeast in December 2011, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Charlene Peiffer noted that employer costs for employee compensation in the other two regions were \$27.66 in the Midwest and \$29.90 in the West. (See chart 1.) Employer Costs for Employee Compensation are based on the National Compensation Survey, which measures employer costs for wages, salaries, and employee benefits. (See table 1. Geographic definitions of the regions and divisions are contained in the Technical Note.)

Technical note

Employer Costs for Employee Compensation (ECEC) measures the average cost to employers for wages and salaries and benefits per employee hour worked.

Employer Costs for Employee Compensation data in this release cover private industry. Excluded from private industry are the self-employed and farm and private household workers. The cost levels for this quarter were collected from a probability sample of approximately 48,200 occupations selected from a sample of about 9,400 establishments in private industry. The private industry sample is rotated over approximately 5 years, which makes the sample more representative of the economy and reduces respondent burden. Data are collected for the pay period including the 12th day of the survey months of March, June, September, and December.

Employer Costs for Employee Compensation data on total compensation, wages and salaries, and benefits in private industry are produced annually in the March reference period for 15 combined and metropolitan statistical areas (CSA and MSA). For further information about metropolitan area ECEC

estimates see: “BLS Introduces New Employer Costs for Employee Compensation Data for Private Industry Workers in 15 Metropolitan Areas,” at www.bls.gov/opub/cwc/cm20090921ar01p1.htm.
